

October 19, 2020

It would seem that the weather is slowly getting cooler and we are at least taking a few steps back toward a touch of “normalcy!” It is great to see drivers and buses moving around the yard again. We are currently running nine food delivery routes for Westside and AVUHSD and forty-one SPED routes for AVUHSD. The combination of these routes has put approximately fifty-nine drivers and aides back in buses. As has been the case since the beginning of the COVID challenges, there is not much that is solid in the way of future plans. It is just our job to maintain a high level of preparation so that when the opportunity does present itself, we are in a position to meet all the needs of our member districts.

Over the summer, we finished the installation of all of our charging stations for our new electric buses, and on Friday, we accepted delivery of the first two of four of our new SPED buses. Once bid is held, we will be updating driver competencies to include our SPED and transit electric buses, and get those buses on the road! We are really excited to get them worked into our fleet and routes.

We know that the challenges have been great over the last eight months, but our training, hard work, and planning have prepared us to face those challenges. Thank you all for your dedication and positive attitude in the face of all of this adversity. We will be successful in meeting all challenges and be a stronger, better organization in the future!
