

April 6, 2021

On April 5, 2021, the Los Angeles County Department of Public Health updated the Travel Advisory and Guidance regarding out-of-state non-essential travel. In the attached memo, the self-quarantine requirements were revised as follows:

Fully Vaccinated Persons

“*Fully vaccinated* persons may travel but should continue to take precautions. If asymptomatic, no quarantine or testing is needed upon return.

A person is considered fully vaccinated ≥ 2 weeks following the receipt of:

- the second dose in a 2-dose series (Pfizer-BioNTech or Moderna)
- one dose of a single-dose vaccine (Johnson and Johnson/Janssen)

Persons Who Are Not Fully Vaccinated

“3. All non-essential travelers who are not fully vaccinated arriving in or returning to California from other states or countries must:

- a. **Quarantine** for 7 full days after travel if they get tested and get a negative COVID-19 viral test result from a specimen collected 3-5 days after their arrival.

Note: Persons who have recovered from laboratory confirmed COVID in the past 3 months and are asymptomatic do not need a viral test. They can end quarantine after 7 full days. Recovery from COVID-19 is defined as having completed isolation.

- b. **Quarantine** for 10 full days after travel if they did not get tested with a COVID-19 viral test after their arrival.

Please be advised, employees will not be permitted to work during his/her required self-quarantine period. Employees must include the self-quarantine period in their leave request and will utilize their earned sick leave.

Thank you for your understanding and cooperation during this difficult time.

Morris Fuselier, III.

CEO
